

# Fire Risk Assessor Course with MII FPAM

## IFEM-MII-FPAM Fire Risk Assessor Course

IFEM co-hosted Fire Risk Assessment course with MII (Malaysian Insurance Institute) and FPAM (Fire Protection Association Malaysia) for Risk Engineers of insurance industries with the objective in reduction of industrial fire risks. The modern teaching approach in practical performance-based learning method focus on mindset change, analytical approach, and logical thinking. This will compliment prescriptive design for all completed buildings where risk and hazard changes with time. Practicing risks engineers find FRA course interesting with a new dimension that takes them further in understanding of fire and smoke behaviour, impact on building structure, fire and smoke impact on human, mitigation of fire risks, etc.
